

# Securing Our National Borders

## *EXECUTIVE SUMMARY:*

- Declare war on the Mexican Drug Cartels
- Remain in Mexico must become the law of our land
- We should up tempo the deportation of illegal aliens
- We have both insurrection and a public health crisis at our southern borders
- President Trump and/or Governor Greg Abbott of Texas should use National Emergency powers to secure our borders in full
- Build a wall with high-levels of technology and drone capabilities
- STOP Catch and Release
- STOP chain migration and anchor baby extension
- STOP birth right immigration for parents of illegal aliens (law breakers)
- Create a militarized No-Entry Zonne (NEZ) along our Southern Borders

## *FULL COMMENTARY:*

Securing our national borders is one of the primary cornerstones of a free and prosperous Constitutional Republic. The United States of America should have clearly defined geographical barriers of protection that preserves the freedoms and liberties of all Americans. As a beacon of light and a shining example of hope and prosperity, America is a hiding place and a safe haven for those seeking to experience the totality of freedom through the process of entry *appropriated and enforced by law*. Laws of a porous nature will not stand the test of time. In other words, without the enforcement of our immigration laws, our country will soon cease to exist. Enforcement, consent of the governed, alignment to God's moral law, and an abiding affection and faith toward the laws of the land by its citizenry, will procure a most favorable and long-lasting result that will be highly esteemed by posterity.

I believe that we are currently seeing an insurrection and public health crisis at our southern borders that must be swiftly dealt with. My position includes a multi-faceted approach to sealing our borders from illegal immigrants that include drug lords, hardened criminals, and terrorists, those who are sex and human trafficking, and others who would abuse and violate both human rights and God's natural laws. Conservatives should propose a strategic guide for stopping the illegal flow of immigrants. Here are some vital first steps:

1. Congress needs to provide the funding necessary to build a wall. Use all legislative means available to help provide and advocate for border security funding that includes a permanent and high-tech wall structure.
2. The President has the authority to execute the laws of the land. Therefore, the millions of known immigrants who have violated our immigration policies along with those unknown illegals subsequently identified, must be deported. We must increase deportation to send a message that illegal immigration will not be tolerated on our shores.

3. We need to expand the scope of the President's legal and constitutional national emergency powers with an increased military presence (No-Entry Zone – NEZ) until our borders have been sealed. This proposed military presence will include those who have the specific skill sets to capture, detain, feed, house, process, deport and/or be caregivers. A progressive accumulation of forces should be used to stop the flow of illegal immigration. Once this objective has been achieved, we deliberately draw down our presence commensurate with diminished illegal immigration activity.
4. Additional economic pressure should equally be applied to those countries from where the illegal immigrants originate as well as our close friend and ally, Mexico. We must expect cooperation from our southern partners.
5. We must revamp the immigration and asylum laws on our books to stop chain migration, catch and release, faulty claims of “credible fear of persecution”, “anchor baby” extension, and children immediately being turned over to Health and Human services and placed in the “least restrictive setting” that consequently lead to illegal behavior. The Biden administration has created the enabling processes that help illegal immigration flourish.
6. Ending the travesty of illegal immigrants receiving welfare, free education, and other entitlements that encourage the unseemly and unlawful behavior is critical. We are simply making it too easy for immigrants to break our laws. This must stop.
7. We must enact legislation that cuts off all federal funding for sanctuary cities who would circumvent federal laws that support legal immigration and provide a safe haven for those who break U.S. laws.
8. We must codify the remain in Mexico policy as the law of the land in the United States.

I believe that the crisis at the border is a very complex web of poor immigration laws, inadequate enforcement, misdirected funding, hyper-politics, rogue sanctuary cities, and creative loopholes by the progressive liberals in the Democrat Party. We must all remember that this American crisis is being played out over raw and unadulterated power. The Marxists and progressive left want to allow as many illegals in our country as possible to bolster the number of Democrat Party voters. By doing this, the Democrats feel that they will control the illegal's vote and ultimately long-term power. As Americans, if we stand up, take the lead, and say enough is enough, our leaders will follow. “We the People” must reign on the immigration front.
